Steps to Deploy Application

Host: Heroku

Prerequisites:
1. Install Heroku CLI
   ```
   $ npm install -g heroku-cli
   ```

Deploying to Heroku
1. Create Heroku account
2. Create a new app in Heroku
3. In command line
   ```
   - $ heroku login
   $ cd project folder
   $ git init
   $ heroku git:remote -a appName

   $ git add .
   $ git commit -am "text"
   $ git push heroku master
   ```

- terminal will give us link to deployed app.
